U.S. Politics

Survey of Americans

April 20, 2026

Methodology

This week, we conducted a survey of Americans to explore their views on American politics.

Method

Online survey among respondents 18 years of age or older.
(American sample: **n= 1,004**)

Respondents were randomly recruited using LEO's online panel.

Weighting

Results were weighted according to **age, gender, region, education, ethnicity, and number of people in the household** in order to ensure a representative sample of the American population.

When

Data collection from **April 17 to April 20, 2026**.

Margin of error

For comparison purposes, a probability sample of this size yields a margin of error no greater than **±3.09%**, (19 times out of 20) for the American sample.

Significant differences

Data in bold **red** characters indicate a significantly lower proportion than that of other respondents. Conversely, data in bold **green** characters indicate a significantly higher proportion than that of other respondents.

Rounded data

The numbers presented have been rounded up. However, the numbers before rounding were used to calculate the sums presented and might therefore not correspond to the manual addition of these numbers.

Questions

Have questions about the data presented in this report? Please contact Andrew Enns, Executive Vice-President, Central Canada at the following e-mail address: aenns@leger360.com or Sébastien Dallaire, Executive Vice-President, Eastern Canada, at sdallaire@leger360.com.

➔ Notes

A more detailed methodology is presented in the Appendix.
